Investment objective

The aim of the Fund is to provide a secure and stable investment return primarily through acquiring social real estate. It is intended that the assets targeted for acquisition by the Fund will offer a consistent income stream with capital growth prospects. The Fund's aim is to provide investors with an income return (after all fees) of 5% per annum and some capital growth in the long term.

Fund commentary

The Fund was launched on 18 May 2017.

The Fund has generated a total return for the eight month period from 18 May 2017 to 31 December 2017 of 4.92% (based on the Class A Gross Accumulation Shares). This includes the income of 1.29% which was distributed in November 2017.

In December 2017 the Fund completed the acquisition of a further five social real estate long income properties, raising the value of the Fund's property portfolio to £15.8 million. As at 31 December 2017 the Fund's property portfolio comprised of nine long income properties within the social real estate sector.

Dealing in the shares of the Fund is available on a weekly basis each Thursday (or if not a business day, the next business day) and the last business day of the month.

All properties have income growth and inflation mitigation through inflation linked upwards only regular rent reviews.

Investor rationale

- Investment generates long-dated, unlevered, inflation correlated income streams
- Provides diversification from commercial real estate to provide less cyclical expected returns
- Enables investors to provide a positive impact to society whilst generating an expected long-term, attractive risk adjusted return

Social real estate rationale

- Significant reductions in the availability of government grants for social real estate has created a need for long-term capital from the private sector
- Changing demographics – an ageing population in the UK is increasing end-user demand
- Financial benefits – assisted and supported living is more affordable for local authorities than full residential care
