

TIME:AIM uses a 'smart passive' approach in selecting Business Property Relief (BPR) qualifying companies listed on the AIM market. The Service is designed to offer investors Inheritance Tax (IHT) relief in just two years while also aiming to provide lower volatility returns than the AIM market.

SMART because we use an innovative, defensive market screening process

PASSIVE because we remove stock picker bias and ignore market sentiment

TIME:AIM performance

The TIME:AIM performance is representative of an Investor who invested in the TIME:AIM service and received AIM shares on 21 November 2016. The TIME:AIM performance is calculated based on the Investor's Net Subscription Amount net of the Initial Charge, the Adviser Initial Fee, the Dealing Fee and any retained monies by the Custodian to facilitate the payment of ongoing charges. The performance figures are inclusive of dividends receivable and after all annual charges.

Risk factors

An investment in the Service carries risk and may not be suitable for all Investors. Investors should refer to the Product Brochure and Application Pack, copies of which are available from one of our team. Below are the key risks of the Service:

- Past performance is not a guarantee of future performance
- Tax reliefs are not guaranteed
- Your capital is at risk
- This should be considered a long term investment
- Liquidity cannot be guaranteed

Why the smart passive approach?

Our smart passive approach seeks to remove the subjectivity of decision making and emotional bias which can affect the investment decisions made for portfolios which are actively managed by a fund manager. Our approach uses verifiable financial and commercial information published by AIM companies to determine the portfolio of shares for an investor, rather than relying on an individual stock picker’s opinions regarding the future commercial success of AIM companies and the quality of their management teams.

It is our view that the smart passive approach provides a robust investment strategy which is less exposed to human risk factors, such as the departure of a fund manager or stock picker bias.

A welcome secondary benefit of this approach is that we are able to offer this service at around half the annual management fee of many of the traditional AIM BPR fund managers.
