TIME Investments

FATCA GIIN Registration

UA921E.99999.SL.826

*Past performance includes that of Commercial Freehold Fund which merged by share exchange with Commercial Long Income PAIF on 1 April 2019.

Fund aim

The aim of the Fund is to offer shareholders a consistent income stream with some capital growth prospects through acquiring property with long leases including commercial freehold ground rents and commercial freehold property which benefit from long leases.

Fund characteristics

Income consistency

Our properties aim to generate consistent income. This is achieved through long, high quality tenancies, the financial strength of the tenants, and/or an over-collateralised ground rent structure.

Inflation linked

Around 94% of rent reviews are linked to inflation or have a fixed uplift, rather than being subject to open-market negotiation. The majority of the rent reviews are upwards only.

Diversified portfolio

The portfolio is made up of properties around the UK, across many different sectors of the economy.

Lower volatility

The Weighted Average Lease Term (WALT) is more than five times greater than many traditional UK commercial property funds. This removes significant uncertainty in valuation around the potential loss of tenants.

Track record

The TIME group has a long track record in long income property and manages over £3 billion of UK long income property assets.

Capital growth

The fund may benefit from capital value increases in its property portfolio. This can happen in several ways, such as rental growth, lease extensions and yield shift.

Fund managers

Nigel Ashfield is the Managing Director at TIME and has over 20 years' experience in fund management and finance. Nigel has responsibility for over £1 billion of tax

efficient investments and is also fund manager of TIME:Freehold, a ground rent fund with a 29 year track record of positive returns, and TIME:Commercial Long Income.

Roger Skeldon has over 15 years' experience in fund management, finance and commercial property, primarily focused on long income property

and the deployment of capital into sectors such as logistics. He has been at TIME Investments for over 10 years and is Fund Manager for TIME:Commercial Long Income, TIME:Social Long Income and TIME:Property Long Income and Growth.

Featured asset - DPD Delivery Unit

TIME:Commercial Long Income's construction of a delivery unit located in Tipton, Midlands was completed in September 2019. The asset was purchased for £14.7 million and let on a 25 year lease to DPD Group UK starting from the completion date of 23 September 2019. The rent review of the property is five yearly with a Net Initial Yield of 4.62%.

Fund manager commentary

Fund manager commentary

The Fund has continued to deliver a consistent income return from its portfolio which has contributed to the total return seen over the last 12 months. Positive performance and valuation appreciation have been seen across the majority of sectors where the Fund has an exposure, including those sectors that faced high-levels of operational pressure during the outbreak of COVID-19 and through 2020, such as the hotel sector. With increased volatility and uncertainty in traditional asset classes, alternative sectors such as real estate can lower that volatility and provide greater diversification.

The Fund has no vacant properties and operational stability has returned to most sectors. Some tenants were allowed to defer their rent in periods during COVID with repayments expected through 2022.

Expectations of increased interest rates alongside high inflation have put pressure on pricing in many asset classes, with bond yields reflecting these expectations. There are various other factors that influence property yields and values, such as other macroeconomic factors like economic growth, but also factors such as supply and demand, or rental growth which will also be driven by specific sector or property aspects. Long income property gives better visibility of occupancy alongside the inflation linked or fixed rental growth rent review structures which provide more clarity and typically result in lower volatility. During times of uncertainty and volatility a flight to more defensive real estate, such as long income property, often happens which could offer further protection against valuation movements.

Fund performance

The performance of the Fund has been consistent, and this remains the case with a positive return of 0.19% during the month of August 2022. For the 12 month period ended 31 August 2022 the Fund has produced a positive total return of 5.53%, comprising an income return of 3.94% and a capital growth of 1.59%.

Some negative valuation movement was seen in the logistics sector this month in reaction to rising interest rates and pressure on property yields within the sector which had compressed to relatively low levels. This was offset by increased valuations in the other sectors the Fund has exposure to.

The Fund's income for the quarter to 30 June 2022 of 1.01% (based on the Class A Gross Accumulation shares) was paid on 31 August 2022. The property portfolio of the Fund will next be valued by the independent valuer at the end of September 2022.

Outlook

Supportive dynamics continue to be seen across many of the sectors within the portfolio, which combined with the rental growth profile of the portfolio, signals an encouraging outlook for the Fund in the long term. The Fund has never had exposure to sectors such as high street retail and shopping centres which are going through a structural change. As mentioned, the logistics sector has seen some yield movement in reaction to the current interest rate environment but occupier demand within the sector remains robust.

Traditional commercial property with shorter leases and rent reviews linked to the open market typically has more volatile performance as income and capital is more reactive to short term changes in the market conditions and tenant behaviour. Long income property removes some of this volatility through the length of the lease (visibility of occupancy) and structured rent reviews, resulting in a more consistent long-term return.

The WALT of the portfolio is 47 years which gives significantly greater visibility of income than in traditional commercial property. The consistency and security of income is achieved through the specific

features of long income, which includes the visibility of income through the high Weighted Average Unexpired Lease Term, married with tenant quality, sector sustainability, and quality of the real estate.

Increased levels of inflation remain a concern for investors, especially in a period where rental growth in many sectors of traditional commercial property remains uncertain but one of the key features of long income is the comfort provided by structured rent reviews. Within the portfolio, around 94% of the rent reviews are linked to an inflation index or have a fixed percentage growth. It is worth noting that the portfolio currently has no voids.

The Fund and its property portfolio are well-positioned, and we anticipate the positive performance to continue, with an annualised income return of over 3.5%, with that income return expected to grow in 2022 and 2023. Please visit our website for all updates and information as it becomes available.

Latest fund updates

FCA consultation on open-ended property fund structures

The Financial Conduct Authority (FCA) has proposed a consultation on open-ended property funds. The FCA has proposed that longer redemption periods would benefit investors. On 7 May 2021, the FCA released a feedback statement on their consultation. If the FCA does proceed with applying mandatory notice periods for authorised open-ended property funds, which is, at this time, not certain, the FCA has stated that the proposed changes for authorised open-ended property funds would not be implemented until 2024 at the earliest.

HMRC consultation on ISA investment in open-ended property funds

HMRC has recognised that the FCA's consultation proposals may run contrary to ISA legislation, which requires ISA investors to be able to access their funds or transfer them to another ISA within 30 days of making an instruction to their ISA manager. Under current legislation, such property funds would no longer be ISA eligible investments. In order to mitigate the impact on ISA holders if the FCA's consultation proposals are introduced, HMRC is considering whether to allow existing ISA investments in open-ended property funds to remain within the ISA, while potentially prohibiting 'new' ISA investments in such funds. The HMRC consultation closed on 13 December 2020, with its findings expected to be published this year.
